AirTag Keyring Case

Secure your AirTag to your belongings with our AirTag Keyring Cases! Available in both silicone and PU synthetic leather, the high-quality cases will keep your AirTag protected and securely attached to your everyday items, such as your keys or bag. Both silicone and PU leather come with a spring keying included, meaning attaching and detaching your AirTag case is quick and easy.

The silicone casing is easily set up- simply stretch the silicone case around the AirTag until tight. The PU leather version comes with a pop button that simply needs to be pulled open to store your AirTag securely inside. Both materials have a large clear branding area with the PU leather version having the option of high-quality embossing.
