

DITOO

Divoom best selling retro pixel art speaker

Innovative

Retro nostalgia

Fusion of elements

Technology & Design

Hardware Design Concept

Shaped like a personal computer with the mechanic keyboard and functional lever, Ditoo-Plus has a strong trait of nostalgia design.

This is a heart warming design where everyone can relate to, as it recall the excited memory when they first used a computer.

Nostalgia meets funky!

The functional lever recalls the memory of joystick on the iconic arcade machines.

Craftsmanship at the finest

Speaker does not have to be boring!

This is a masterpiece

Whether is the keyboard, lever or shape
These are the trademarks of 80 and 90
These icons should not just fade away
This is the tribute to the legends.

Pixel art creation

Continued to improve and evolve with the suggestions from its user community

- Simple to use user interface
- Multiple creation tools
- 8-bit pixel art size
- Vivid colors selection
- Pixel animation creation
- Text editor w/custom background
- Convert picture to pixilated design
- Convert design to picture and GIF
- Massive gallery for sharing

Pixel art community

JOIN THE PIXEL ART COMMUNITY
Since 2015, we wanted to create a community for pixel art, which was a crazy idea for a speaker brand!

We invited legendary professional pixel artists, like: eBoy from Germany, Mr. Dot-man from Japan. There are indie-game developers and pixel art fans, where everyone can share and interact with each others.
