

MiLi MiCard

Rechargeable Smart Anti-Theft Card
Secure your belongings wherever you go

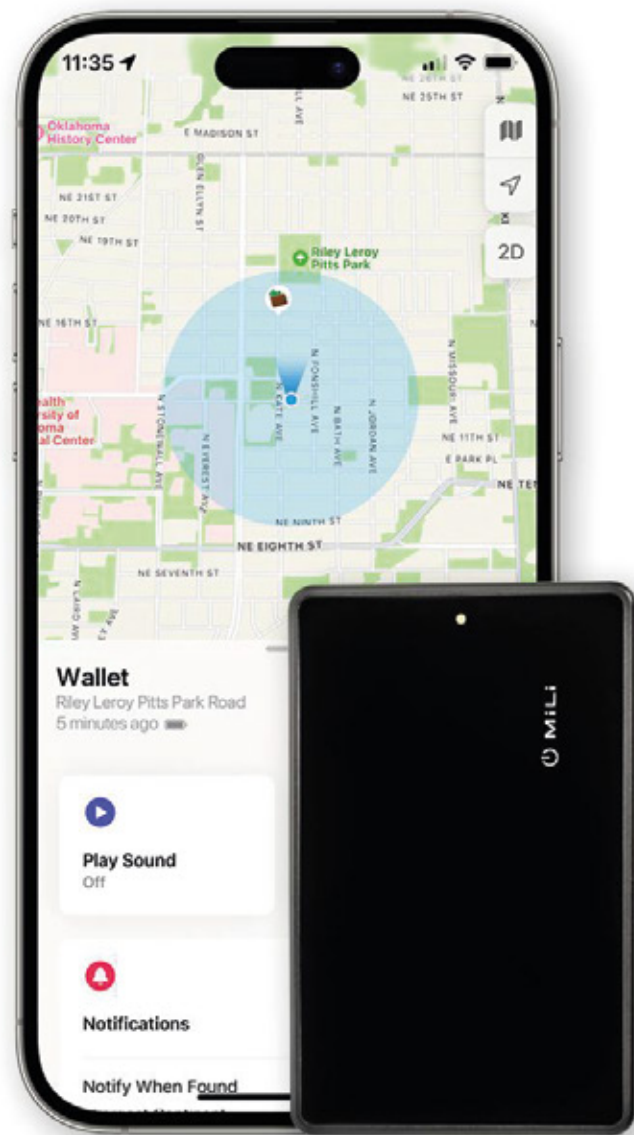

Works with the Apple Find My App

Locate

When your item is lost, you can easily check its recent location through the Find My App.

Play Sound

Sometimes things just hide nearby. With a very loud sound you can find them in no time.

Left-behind Reminder

Receive a notification when you accidentally leave your item behind, or when the Find My Network locates your missing item.

Support NFC

NFC is a short-range wireless communication technology that enables devices to exchange data when they are in close proximity to each other, typically within a few centimeters. Many modern smartphones and smart devices are equipped with NFC, making it convenient for users to make payments or exchange data by simply tapping their device on an NFC-enabled reader or another compatible device.

Always know where your wallet is

When it goes missing, hundreds of millions of Apple devices that are part of the Find My network will help you locate it.

Keep Your Privacy

The Apple Find My network uses advanced encryption to ensure that nobody, not even Apple, can view the location of your device.

Supports Wireless Re-Charging

The MiCard is designed for continuous daily use, which requires a reliable battery and charging solution. With a battery charge that lasts between 4-6 months, wireless charging enables a convenient way to power the MiCard and keep it on the map.

(The indicator light remains constant after being fully charged.)

Specification

Size: 85 x 54 x 2.6mm

Material: Tempered Glass + Metal Frame

Battery Specifications: Polymer Battery 180mAh

Charging method: Wireless Charging

NFC : Support

APP Version: BLE 5.2 / iOS14.5 and above

Operating voltage: 3.0V

Standby current consumption: 4-21uA

Separate state current: 60uA

Transmission distance: 30-50m (open environment)

BLE operating frequency: 2.4GHZ

BLE transmit power:-4db

Operating Temperature:-20~60C
